

## Lake Management Plan Focus: Problem-Solving Session

Group: 1. Water Quality 2. Fisheries Management Plans 3. Aquatic Vegetation 4. Wildlife 5. Exotic Species 6. Land Use and zoning 7. Public Water Access		Participant Names:
1 Define the problem or challenge in your own words (identify what your desired outcome is).		
		
2 Why hasn't it been fixed (or accomplished)? List top three reasons		3. What is possible in the current context? List top 2-3 promising solutions.
		
4 What do you need to advance these solutions?		
Critical tools, data, and information	Critical leadership, capacity, connections	
What are the gaps in resources for these solutions?	Narrative & communications: What values, key messages, or language should be lifted up to support these solutions?  (What messages or language are a barrier to these solutions?)
