

## Score Your Shore

### Score Your Shore: A Citizen Shoreline Description Survey Now Available

Score Your Shore: a citizen shoreline description survey  
available from the MN DNR

Score Your Shore is a tool to assess habitat conditions of developed lake lots. The protocol is designed for use by lakeshore property owners to self-assess habitat and stewardship on their land and adjacent aquatic areas. This tool may also be used by organizations, such as lake associations, to assess multiple sites on a lake. Score Your Shore provides an objective and systematic method to assess the type, quantity and quality of the existing shoreland habitat.

The Score Your Shore tool will enable you to:

- Assess the amount of habitat at developed lake sites
- Generate awareness of what makes a high quality functioning shoreline buffer
- Provide a system to recognize landowners with functioning shoreline buffers.

The following self-guided materials are available to view and download, free of charge, on the DNR
